

Lockout Kit OSHA-K01

- ◆ This safety lockout kit simplifies the lockout for larger machines. After the equipment to be worked on has been isolated from the energy source, the lockout keys are placed inside the multiple lockout kit and then padlocks by the controlling person. Each person then working applies their own unique padlock to the lockout kit. Only when all unique padlocks have been removed, can the necessary keys be reissued to restart.

Part Code	Description	Package
OSHA-K01	Safety lockout kit	1pc/box
